

## WHY CPR IS IMPORTANT?

- Nearly 85% cardiac arrests occur out of hospital in India.
- In recent days there are multiple incidences of sudden cardiac arrest (SCA) during exercise or sporting activity even in otherwise healthy individuals.
- Cardiopulmonary resuscitation (CPR) is an emergency procedure performed in case of SCA.
- Ability to perform good CPR can save a life of Most of the SCA victims.
- Cardiac arrest victims outside hospitals do not survive due to lack of awareness of SCA & CPR A good quality CPR Can enhance the victims Odds of Surviving SCA.
- Every Minute Matters in a Cardiac Emergency as 1 minute delay in CPR reduces 10 % chances of survival.
- CPR Makes AED's More Effective
- Let's learn CPR from the experts and become a lifesaver.
